• **About CERT.br**

CERT.br is the Brazilian National Computer Emergency Response Team, maintained by [NIC.br](#) – the executive branch of the [Brazilian Internet Steering Committee](#). CERT.br is responsible for handling computer security incident reports and activity related to networks connected to the Brazilian Internet.

[Learn more about CERT.br](#)

• **Incident Handling**

Documents and tips, in Portuguese, to structure and operate a CSIRT, as well as contact information for incident reports:

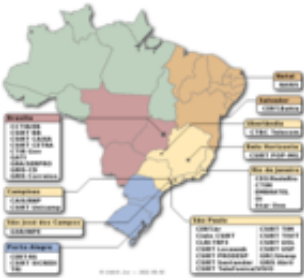

- [Support material for CSIRTs](#)
- [Contact information for Brazilian CSIRTs](#)
- [Contact information for CSIRTs around the world](#)
- [Incident reporting FAQ](#)

• **[Projects](#)**

CERT.br develops [Internet attacks trends analysis projects](#), with the goal to better understand the threats in the Brazilian Internet space:

- **Distributed Honeypots**: to increase the capacity of incident detection and event correlation;
- **SpamPots**: to obtain details about the abuse of the Internet infrastructure by spammers.
