About Us

ThaiCERT is the Computer Security Incident Response Team (CSIRT) for Thailand and provides an official point of contact for dealing with computer security incidents in Thai Internet community.

Founded in 2000 by National Electronics and Computer Technology Center (NECTEC) under Ministry of Science and Technology, ThaiCERT has been the first and only non-profit CSIRT in Thailand. In February 2011, by the resolution of Thai cabinet ThaiCERT operations were transferred to a new administrative team in a new public organization named Electronic Transactions Development Agency (ETDA) under the supervision of Ministry of Information and Communication Technology.

ThaiCERT collaborates with Thai government sector, organizations, universities, ISPs and other relevant entities to handle computer security incidents in Thailand. Additionally, as a full and active member of Forum of Incident Response and Security Teams (FIRST) and Asia Pacific Computer Emergency Response Team (APCERT), ThaiCERT coordinates with both globally and regionally trusted CSIRTs in responding to computer security incidents.
