

# Stronger Together!

An initiative to enhance the collaboration between public and private CERTs in Luxembourg.

# About cert.lu

The objective is to create a community gathering all the major actors and their expertise under a unique label and platform: CERT.LU. It is not only important for the local market but also when representing Luxembourg abroad.

## Code of Conduct

- Members of CERT.lu will in its operations act in such a way that it sets an example of responsible Internet and security behaviour.
- Members of CERT.lu receiving or holding information, regardless of the subject matter, that may affect either another CSIRT team's constituency, the community of CSIRTs as a whole, or the security of the Internet or its users, will handle this information responsibly and protect it against inadvertent disclosure to unauthorised parties.
- The security of the methods of storing and transmitting information inside or outside the team, will be appropriate to its sensitivity using the Traffic Light Protocol (TLP) (<https://www.circl.lu/pub/traffic-light-protocol/>) for classification and sharing of sensitive information.

### Principle #1 Improve the security posture of Luxembourg ⊞

The economical attractiveness of a country depends on multiple factors. Luxembourg has become an attractive place for global players especially in the ICT field. Information security is a key factor for trustable ICT platforms. The CERT.lu initiative is there to enhance cyber security practices and techniques, and support security professionals in Luxembourg.

### Principle #2 Share for advanced cyber security actions ⊞

### Principle #3 Help citizens and organizations to raise their security defences ⊞

This *Code of Conduct* is based on ENISA's Good Practice Guide for Incident Management ([http://www.enisa.europa.eu/act/cert/support/incident-management/files/good-practice-guide-for-incident-management/at\\_download/fullReport](http://www.enisa.europa.eu/act/cert/support/incident-management/files/good-practice-guide-for-incident-management/at_download/fullReport)), Annex II - CSIRT Code of Practice

## Join Us!

By joining, you can gain from an additional national visibility, share and exchange with your CERT colleagues and benefit from the cyber threat exchange platforms.

## Members

CERT members of the CERT.lu initiative:

- ALL
- ACCREDITED
- PRIVATE
- PUBLIC

HEALTH CARE

EDUCATION & RESEARCH

ECONOMY & LOCAL GOVERNMENT

NAT / GOV & CRITICAL INFRA.
