UCD Centre for Cybersecurity & Cybercrime Investigation (UCD CCI) is a unique, world-class education and research centre with strong and well-established collaborative relationships with law enforcement and industry.

For over 15 years, UCD CCI has equipped teams of international cybercrime experts with the skills, knowledge and tools to pre-empt and protect against increasingly serious cybercrime attacks. The Centre's exceptional research and training techniques have empowered national and international law enforcement agencies such as An Garda Síochána, INTERPOL and Europol, industry sector groups such as the Irish Banking Federation (IBF), and large global corporations such as Microsoft.

UCD CCI has created a network of formal relationships with INTERPOL, Europol, Visa (Europe), the IBF and IMPACT, and informal collaborations with UNODC (United Nations Office on Drugs and Crime), the OSCE (Organization for Security and Co-operation in Europe), OLAF (the European Anti-Fraud Office), Microsoft, CitiBank, INFACT and eBay.

UCD CCI works closely with law enforcement to identify key focus areas for research, training and tool development.
