New Norwegian
 Norwegian

SERTIT's primary task as a public Certification Authority for IT Security in Norway is to issue Certificates and Certification Reports. Formulation of framework and to make sure that the rules are followed by all the parties involved is also part of SERTIT's responsibilities. Companies that want to join the Scheme as an IT Security Evaluation Facility (ITSEF) has to be approved by SERTIT. The management of ITSEF and the evaluation process is carried out under supervision by SERTIT.

SERTIT is representing Norway as a member of the international community called "Arrangement on the Recognition of the Common Criteria Certificates in the field of Information Technology Security (CCRA)".

For more detailed information on SERTIT's terms of reference, see the document The Norwegian Certification Scheme, Sd 001E.

The 16th International Common Criteria Conference.
