## The Australian Cyber Security Centre

The Australian Cyber Security Centre is an important Australian Government initiative to ensure that Australian networks are amongst the hardest in the world to compromise.

### Partnering for a cyber secure Australia

The centre brings together existing cyber security capabilities across Defence, the Attorney-General's Department, Australian Security Intelligence Organisation, Australian Federal Police and Australian Crime Commission in a single location – the [Ben Chifley Building](#) in Canberra.

Importantly, it is a hub for greater collaboration and information sharing with the private sector, state and territory governments, academia and international partners to combat the full range of cyber threats.

---

### REPORT A CYBER SECURITY INCIDENT

*Reports help the ACSC to develop a better understanding of the threat environment and will assist other organisations who are also at risk.*

*Cyber security incident reports are also used in aggregate for developing new defensive policies, procedures, techniques and training measures to help prevent future incidents.*
