About SRnIK**

**Computer Incident Response System of the Ministry of National Defense**

Computer Incident Response System of the Ministry of National Defense (MoND) of Polish Republic carries out tasks of the coordination of processes to prevent, detect and respond to incidents of computer systems and telecommunication networks of the MoND. Technical Support Center carries out tasks in accordance with the scope of the CERT Team.

- The main tasks are as follows:
- coordination of computer incident response,
  - events and incidents handling and analysis,
  - carrying out activities aimed at raising awareness related to IT security.

SRnIK co-operates with departments and individuals of Ministry of National Defense and national and international organizations, as well.

**RFC 2350**

Description of the Team according to RFC 2350 "Expectations for Computer Security Incident Response" is available [here](#). The document is signed with the Team PGP key.\

**PGP Mil-CERT key**
